

I Spy:

Scientists use observation as a tool to learn more about a subject. At the aquarium, our staff spend a lot of time watching our animals to learn more about them like specific characteristics that set individuals apart and common behaviors.

Using our Aquarium Webcams, lets play a game of I Spy!

In Shark Lagoon:

https://www.aquariumofpacific.org/exhibits/webcams/webcam_shark_lagoon

1. I spy with my little eye something with triangle fins. Can you find it?
2. I spy with my little eye, something green. Do you see anything that is green?
3. I spy with my little eye, something with spots. Can you find anything with spots?

On Penguin Beach:

https://www.aquariumofpacific.org/exhibits/webcams/penguin_cam_above

1. I spy with my little eye a black and white animal? Do you see any?
2. I spy with my little eye a lot of animals. How many do you see?
3. I spy with my little eye, lots of movement on the beach. Do you see any movement? Can you copy the movements with your body?

Now you can explore on your own. Choose any of our webcams and play your own game of I Spy and see what you can find!
